## FSM Brand Organic OPTimum Forage Mix

FSM Brand Organic OPTimum Forage Mix is a high yielding combination of tall, late maturing, wide leafed oats and tall, highly digestible forage peas. Organic OPTimum does not contain triticale.

### Agronomic & Performance Characteristics

- **FEAST Organic Forage Oats** are late maturing, wide leafed, highly digestible variety.
- **N-Pea Forage Peas** are vigorous, aggressive nitrogen fixers, high protein forage.

Variety Development:	Non-GMO
Seeding Rate alone:	100-125#/acre
Seeding Rate nurse-crop:	65-80#/acre

FSM Brand Organic OPTimum is suited for spring or fall production of a high quality annual forage. The **FEAST** Forage Oats and **N-Pea** forage peas in **Organic OPTimum** have been carefully selected for similar maturity windows, high yields, and excellent digestibility. **Organic OPTimum** can be used as a forage crop or a nurse crop for alfalfa seedings. In the spring, seed as early as field conditions permit, preferably no later than mid-April in southern Ohio and late-April in northern Ohio. For fall production, seed during August when adequate moisture exists for germination. The best combination of yield and forage quality is obtained by harvesting at approximately 60-65 days after planting when the oats are in the boot stage (just prior to head emergence). **Organic OPTimum** will perform well on a wide range of soils throughout Ohio with adequate drainage for timely planting, good water holding capacity through harvest and adequate fertility, including calcium, phosphorus, and potassium. For best results, drill recommended rate of seed 1/2 - 1 inch deep into a firm seed bed. We do not recommend including grasses with alfalfa when using **Organic OPTimum** as a nurse crop. Producers desiring grasses with their alfalfa can successfully broadcast or no-till them in after the **Organic OPTimum** has been harvested.

FSM Brand Organic OPTimum performs best when inoculated with **Bio-Works Pea-Vetch 40** to enhance seedling establishment, nitrogen-fixation and disease suppression.

Use our **Bio-Enhanced Annual Forage Fertility Program** to supply balanced nutrition throughout the growing season, including, essential calcium, phosphorus, and potassium.

*FSM Brand Organic OPTimum Forage Mix is Certified Organic by NICS.*
