Dessie's Summer Lovegrass (aka: Forage Teff)

Dessie's Summer Lovegrass is a cost-effective option for soft grass hay, pasture, or summer cover crop. Quick to establish, Dessie's (Teff) can produce up to 3 tons of soft-leafed dry hay in 6 weeks!

Agronomic & Performance Characteristics

- Quick establishment
- Very soft-leafed
- Quality Hay or pasture
- Up to 3 tons dry hay in 6 weeks!

Variety Development: Non-GMO

Seeding Rate: 3-4#/acre

Dessie's (Teff) is not coated, which often results in quicker, more uniform establishment, especially under dry conditions.

-Best summer annual for dry baling!

-Can be used as an inexpensive, weed suppressing cover crop in prevented planting situations.

Dessie's Summer Lovegrass (Teff) should be inoculated with **Myco-Seed Treat** to enhance seedling establishment at a rate of 4oz/100#.

Use our **BioEnhanced Summer Annual Fertility Program** to supply balanced nutrition throughout the growing season, including, essential calcium, phosphorus, and potassium.

Dessie's Summer Lovegrass (Teff) is non-GMO and untreated, however, always confirm acceptability for organic production with your certifying organization.
