FSM Brand HQ-F Pasture Mix

FSM Brand HQ-F Pasture Mix offers rapid establishment and multiple seasons of high quality pasture production on soils with moderate to good fertility and moderate to good water holding capacity.

Agronomic & Performance Characteristics

HQ-F Pasture Mix featured components:

- **Italian ryegrass** for quick establishment and vigorous production
- Soft-leaved, **endophyte-free tall fescue** enhances yields, quality, and durability
- **Tetraploid & Diploid Perennial Ryegrasses** for maximum dry matter intake and digestible nutrients
- **Alice white clover** for added protein and nitrogen fixation
- **Now with Meadow fescue** for greater nutrient density and stand durability.

Development: Non-GMO varieties
Seeding Rate: 35-40#/acre

FSM Brand HQ-F is an all-purpose pasture mix. HQ-F will establish aggressively if soil temperatures are warmer than 50 degrees and moist, but not saturated, HQ-F should be ready to graze in 4-6 weeks. HQ-F can be drilled 1/4 to 1/2 inches deep or broadcast and pressed into a firm seed bed. Upon reaching 8-12 inches in height HQ-F

should be grazed or clipped to 3-4 inches to allow adequate sunlight for the perennial components to establish well. While circumstances may dictate mechanical harvesting, HQ-F is designed primarily as a pasture mix and longer drying times should be expected. HQ-F should exhibit moderate dry weather tolerance, particularly if fertility is adequate and sufficient growth is left after each grazing to shade the soil during hot, dry periods. Do not overgraze or harvest lower than the recommended height, exposing the soil to the sun raises soil temperature evaporating needed moisture. Leaving insufficient growth during hot, dry weather will prevent optimal performance!

Use **Myco-Seed Treat** at a rate of 4oz per 50# of seed before planting HQ-F for faster, more vigorous establishment.

Use our **BioEnhanced Pasture Fertility Program** to supply balanced nutrition throughout the growing season, including, essential calcium, phosphorus, and potassium.

FSM Brand HQ-F Pasture Mix is available untreated, always confirm acceptability for organic production with your certifying organization.
