FSM Brand Feast Certified Organic Forage Oats

FSM Brand Feast Certified Organic Forage Oats are a wide bladed, late-maturing variety with excellent yields, top-notch digestibility, and good heat tolerance.

Agronomic & Performance Characteristics

- High yielding
 - Excellent digestibility
 - Heat tolerant
 - Generally, very good leaf disease resistance, average rust resistance.
- | | |
|------------------|---------------|
| Seeding Rate: | 100-125#/acre |
| As a nurse crop: | 50-75#/acre |

FSM Brand Feast Certified Organic Forage Oats are a high yielding annual forage that can be planted either in spring or late summer. **Feast** can be used as a nurse crop for alfalfa seedings, however, grasses should be broadcast or no-tilled in after the nurse crop has been harvested. For maximum yields, **Feast** should be seeded as early as field conditions permit in the spring, preferably no later than late-April in southern Ohio and early-May for northern Ohio. For fall production, seed during August when adequate moisture exists for germination. Avoid using **Feast** following a small grain which showed symptoms of rust. For best results, drill 1/2 to 1 inch deep into a firm seed bed. Harvest at approximately 60-65 days after planting when the oats are in the boot stage (just prior to head emergence), for the best combination of yield and forage quality. **Feast** will perform well on a wide range of soils throughout Ohio with adequate drainage for timely planting, good water holding capacity through harvest and adequate fertility.

FSM Brand Feast Forage Oats benefit from inoculation with **Myco-Seed Treat** before planting at a rate of 4oz/100# of seed for enhanced seedling establishment.

Use our **BioEnhanced Annual Forage Fertility Program** to supply balanced nutrition throughout the growing season, including, adequate calcium, phosphorus, and potassium.

FSM Brand Feast Forage Oats are Certified Organic by NICS.
