

# Frenzy Power through crop stress

## What is Frenzy?

Frenzy is a unique enzyme produced by a beneficial bacteria. Dakota Bio has developed a process to remove this enzyme from the bacteria and concentrate it to increase the response and benefit to the plant and to increase tank mix compatibilities. Frenzy is a biotechnology that is the most effective enzyme in helping plants withstand stress, recover from stress and it increases nutrient efficiency. Frenzy is most effective under temporary heat and drought stress in field crops.

## Economic Benefits of Frenzy

### Frenzy on Corn +8.5 bpa

3 years of replicated testing on ind research farms  
97% win rate  
3.7% yield increase

### Frenzy on Soy +2.2 bpa

3 years of replicated testing on ind research farms  
95% win rate  
3.4% yield increase

## Operational Benefits of Frenzy

### Frenzy

- Can be applied foliar or in furrow
- 1 pint (16oz) per acre use rate
- Compatible with herbicides, adjuvants, fungicides, liquid starter fertilizers and insecticides in tank mixes.
- Convenient package sizes
- 2x2.5 gallon case treats 40 acres
- 275 gallon shuttle treats 2200 acres

833-DAKOTAB

Apply before the stress

Reduce negative effects of heat and drought stress

Increase nutrient efficiency and yield

## Agronomic Benefits of Frenzy

Frenzy affects plants at the mitochondrial level. Frenzy causes an increase in the number and output of healthy mitochondria. Increasing mitochondria number and output give plants the ability to withstand and recover from stress and increase nutrient efficiency. Mitochondria are in all plant cells, mitochondria consume nutrients and convert nutrients to energy. Frenzy gives crops the best chance against heat, drought, pests, and disease.

Best when applied foliar with the first herbicide pass on your crop, Frenzy needs to be in the plant before the stress.

Frenzy is compatible in tank mixes with herbicides, fungicides and starter fertilizers.

Frenzy works on all crops and plants.

### ✓ Dakota Bio

Dakota Bio is a privately owned company with employees that have a long history in biologicals and US farming. We understand the challenges and demands on farmers and crop production.

### ✓ What we do

Dakota Bio uses advancements in biotechnology and beneficial microorganisms to create products that increase yields, crop nutritional value and farm income.

### ✓ Born on Date

Dakota Bio is the first and only supplier in the industry to use a born on date on our biological products. The born on date guarantees that your product is made fresh. Fresh and healthy biologicals perform better in your field.

### ✓ Ultra High Purity

Dakota Bio uses pharmaceutical and food grade fermentation for all of our biological products. This brings you the best products possible.
