FSM Brand Prosperity IV Certified Organic Red Clover

FSM Brand Prosperity IV Red Clover is a certified organic, two to three year variety suited for hay or silage production.

Agronomic & Performance Characteristics

- Rapid Establishment
- Excellent overall health and longevity
- Very fast regrowth, strong yields
- Fine stems, very leafy, excellent quality forage

Proper Positioning & Management

FSM Brand Prosperity IV red clover is best suited as a high producing forage or nitrogen-fixing cover crop for certified organic rotations of up to 3 years. Prosperity IV can be frost-seeded into fall seeded grains for "stubble" hay; added to fall, spring, or summer planted annual forages to increase protein, yield and quality; sown alone or with FSM Brand Leader organic Italian ryegrass as a high yielding rotational forage. This variety can also be utilized as a high nitrogen green manure crop. The best combination of yield and forage quality is obtained by harvesting just as the first blooms appear in each cutting. As with other red clovers, Prosperity IV will perform well on a wide range of soils throughout Ohio including soils with moderate to poor drainage. Seed is untreated; therefore, proper rhizobium inoculation is highly recommended. We recommend Myco-Seed Treat. For best results, drill Prosperity IV red clover at 8-10 pounds per acre no deeper than 1/2 inch into a firm seed bed. Fertilizer requirements for red clover include adequate calcium, phosphorous, & potassium. Although additional fertilizer is often not applied to short term forages or plow down crops, our BioEnhanced Organic Alfalfa Fertility Program could be used to supply balanced nutrition for maximum yield, forage quality, and mineral availability in stubble hay.

FSM Brand Prosperity IV Red Clover should be inoculated with Myco-Seed Treat with Rhizobium at a rate of 4oz/100# before planting.

Use an Agri-Energy Alfalfa Fertility Program to supply balanced nutrition throughout the growing season, including, essential calcium, phosphorus, and potassium.

FSM Brand Prosperity IV Organic Red Clover is *certified organic by NICS*.
