

# FSM Bio-Enhanced Mixed Hay Program\*

**Foliar program shown to increase yield (especially when dry) & increase RFQ, often by 20 to 50 points.**

\*Based on 60% alfalfa, 40% grass stand & 1 ton of 2-5-3 manure or equivalent

1/2022

## Green-up Foliar:

MVP	1	2-3 inches of growth Nutrient cycling, health & yield. Soil P less available in spring, needed for growth.
Starter Blend 5-13-4 w/Zn	3	reduces insect pressure & increases Ca uptake
Boron O (2%)	0.25	
Residue WS	0.1	digests winter thatch, manure (optional)

## Post Harvest Foliar:

MVP	1	1 week after every cutting (May-mid August) Multispecies biological Highly available Ca & N for moisture efficiency and growth stimulation.
Forage Boost 10-6-6	3	
Soluble Mg sulfate	0.02	Helps with stress, chlorophyll
Boron O (2%)	0.125	Critical for legumes.

## Reserve Building Foliar:

MVP	1	1 week after last pre-frost cutting (Mid-August through September) Multispecies biological
Premium Blend 18	1	Broad spectrum nutrient blend
4% K-sulfate solution	3	1 gal= K in-plant, 10# 0-0-50
